

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1(Currently Amended). A removable decorative wheel cover for covering wheel hubs on moving vehicles, comprising:

    a thin rigid and pliable disc for substantially covering an existing wheel hub of a moving vehicle, the disc having a blank surface portion for allowing indicia to be selectively added by a user, the blank portion having a washable material for allowing the indicia to be selectively removed; and

    a fastener on one side of the disc for allowing the disc to be removably attached to the existing wheel hub of the moving vehicle.

Claim 2(Original). The removable decorative wheel cover of claim 1, wherein the indicia includes:

    a stencil having at least two different forms of indicia for being selectively applied by the user.

Claim 3(Original). The removable decorative wheel cover of claim 2, further comprising:

    a marker for using the stencil.

Claim 4(Canceled).

Claim 5(Canceled).

Claim 6(Canceled).

Claim 7(Canceled).

Claim 9(Original). The removable decorative wheel cover of claim 1, further comprising:

    a perforated pattern through the disc for allowing a user to selectively remove at least one small portion of material from the disc to form a through-hole therethrough therein, wherein the through-hole is selectively created by the user to allow a valve stem of the wheel hub of the wheel to protrude therethrough.

Claim 10(Original). The removable decorative wheel cover of claim 1, further comprising:

    at least one perforated pattern through the disc for allowing a user to selectively remove at least one small portion of material from the disc to form a through-hole therethrough therein, wherein the through-hole is selectively created by the user to allow at least one of: a valve stem, and a raised portion of the wheel hub of the wheel to protrude therethrough.

Claim 11(Original). The removable decorative wheel cover of claim 1, further comprising:

    at least two separated perforated patterns through the disc for allowing a user to selectively remove at least one small portion of material from the disc to form a through-hole therethrough therein, wherein the through-hole is selectively created by the user to allow a valve stem of the wheel to protrude therethrough.

Claim 12(Canceled).

Claim 13(First Time Amended). The removable decorative wheel cover of claim 12 19, wherein ~~the another side~~ at least one of the front side and the rear side includes:

a blank portion.

Claim 14(First Time Amended). The removable decorative wheel cover of claim 13 19,  
wherein the another sidefront side and the rear side includes:

~~different indicia than the indicia on the one side of the disc.~~

Claim 15(First Time Amended). The removable decorative wheel covers of claim 1,  
wherein the vehicle includes: an automobile.

Claim 16(First Time Amended). The removable decorative wheel covers of claim 1,  
wherein the vehicle includes: a truck.

Claim 17(First Time Amended). The removable decorative wheel covers of claim 1,  
wherein the vehicle includes: a bus.

Claim 18(First Time Amended). The removable decorative wheel covers of claim 1,  
wherein the vehicle includes: a golf cart.

Claim 19(Original). A removable wheel cover for covering wheels on moving vehicles,  
comprising:

    a wheel on a vehicle, the wheel having a wheel hub;  
    a thin rigid and pliable disc for substantially covering the wheel hub, the disc  
    having a front side and rear side;  
    a first fastener on the rear side of the disc for allowing the rear side of the disc to  
    be removably attached to the wheel hub and for keeping the disc on the wheel hub while  
    the vehicle is moving, and for allowing the front side of the disc to be selectively visible;  
    and

a second fastener on the front side of the disc for allowing the front side of the disc to be removably attached to the wheel hub and for keeping the disc on the wheel hub while the vehicle is moving, and for allowing the rear side of the disc to be selectively visible.

Claim 20(New). A removable decorative wheel cover for covering wheel hubs on moving vehicles, comprising:

a thin rigid and pliable disc for substantially covering an existing wheel hub of a moving vehicle, the disc having a blank surface portion for allowing indicia to be selectively added by a user, the indicia including a decal with a fastening surface selected from at least one of: a peel and stick backing, a static cling backing portion, a removable fastener, and a magnetic backing; and

a fastener on one side of the disc for allowing the disc to be removably attached to the existing wheel hub of the moving vehicle.

Claim 21(New). A removable decorative wheel cover for covering wheel hubs on moving vehicles, comprising:

a thin rigid and pliable disc adapted for substantially covering an existing wheel hub of a moving vehicle, the vehicle selected from at least one of: an automobile, a truck and a bus, the disc having a blank surface portion for allowing indicia to be selectively added by a user; and

a fastener on one side of the disc for allowing the disc to be removably attached to the existing wheel hub of the moving vehicle.

Claim 22(New). A removable decorative wheel cover for covering wheel hubs on moving vehicles, comprising:

    a thin rigid and pliable disc sized and adapted for substantially covering an existing wheel hub of a moving vehicle, the vehicle being a golf cart, the disc having a blank surface portion for allowing indicia to be selectively added by a user; and

    a fastener on one side of the disc for allowing the disc to be removably attached to the existing wheel hub of the moving vehicle.

Claim 23(New). A removable decorative wheel cover for covering wheel hubs on moving vehicles, comprising:

    a thin rigid and pliable disc for substantially covering an existing wheel hub of a moving vehicle, the disc having a blank surface portion for allowing indicia to be selectively added by a user;

    a fastener on one side of the disc for allowing the disc to be removably attached to the existing wheel hub of the moving vehicle; and

    at least one perforated pattern through the disc for allowing a user to selectively remove at least one small portion of material from the disc to form a through-hole therethrough therein, wherein the through-hole is selectively created by the user to allow at least one of: a valve stem, and a raised portion of the wheel hub of the wheel to protrude therethrough.

Claim 24(New). A removable decorative wheel cover for covering wheel hubs on moving vehicles, comprising:

    a thin rigid and pliable disc for substantially covering an existing wheel hub of a moving vehicle, the disc having a blank surface portion for allowing indicia to be selectively added by a user;

a fastener on one side of the disc for allowing the disc to be removably attached to the existing wheel hub of the moving vehicle; and

a stencil having at least two different forms of indicia for being selectively applied by the user.

Claim 25(New). The removable decorative wheel cover of claim 24, further comprising:

a marker for using the stencil.
